

What are mammals made of

An Amana book about our wonderful bodies

By: Dr Asmahan - For: you!

SKIN

- All mammals have skin and hair or fur on their bodies; and sweat glands too!
- This protect our insides and keeps us warm when we need it

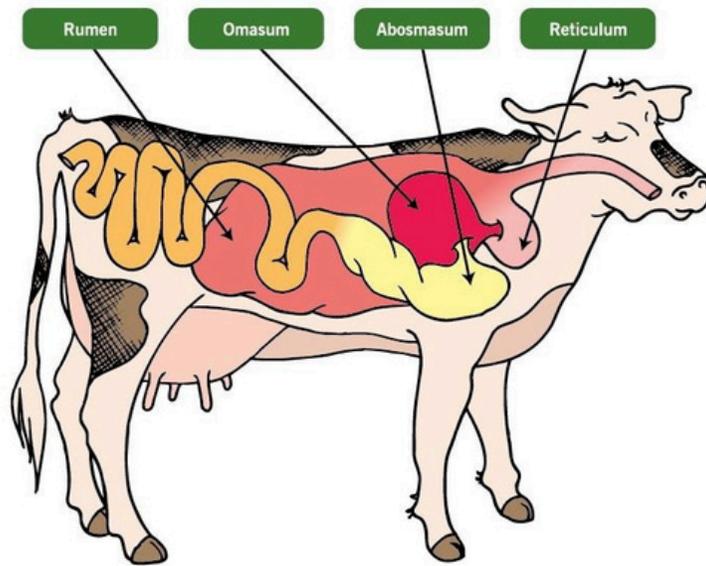

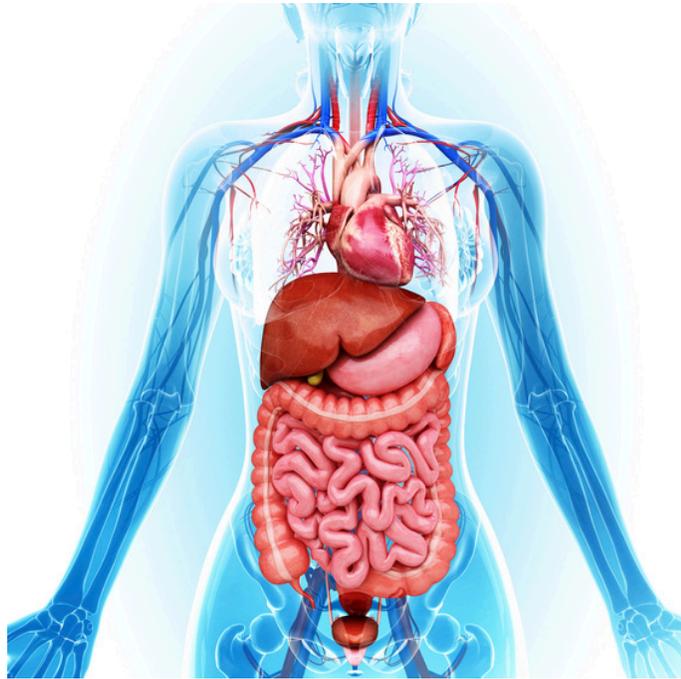

TEETH

- Teeth are used for biting food, chewing, and smiling!

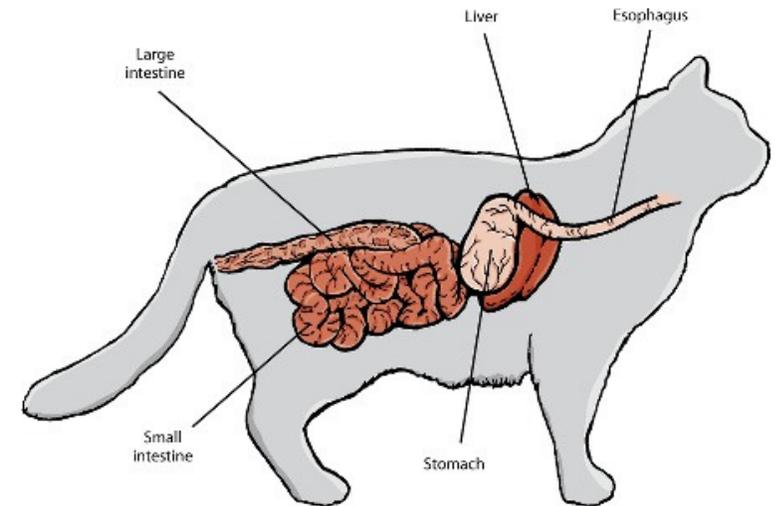

INTERNAL ORGANS

- Internal organs differ in shape and size, but all mammals have a four-chambered heart, and lungs to breathe air
- We use them to breathe, eat our food, and make our whole body work!

Reproductive organs- Male

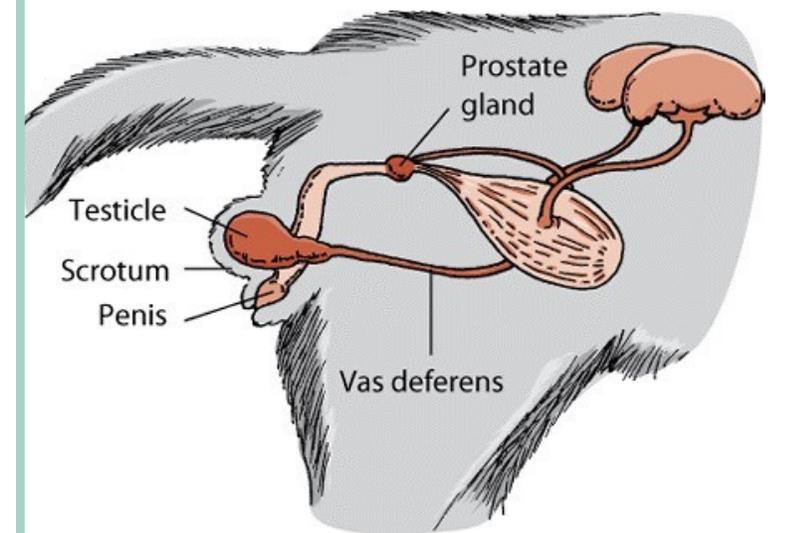

- There are two types of mammals, the male (boy) and female (girl). We need both to make a new mammal (baby).
- Did you know: Even trees have male and female parts that allow reproduction of other trees!

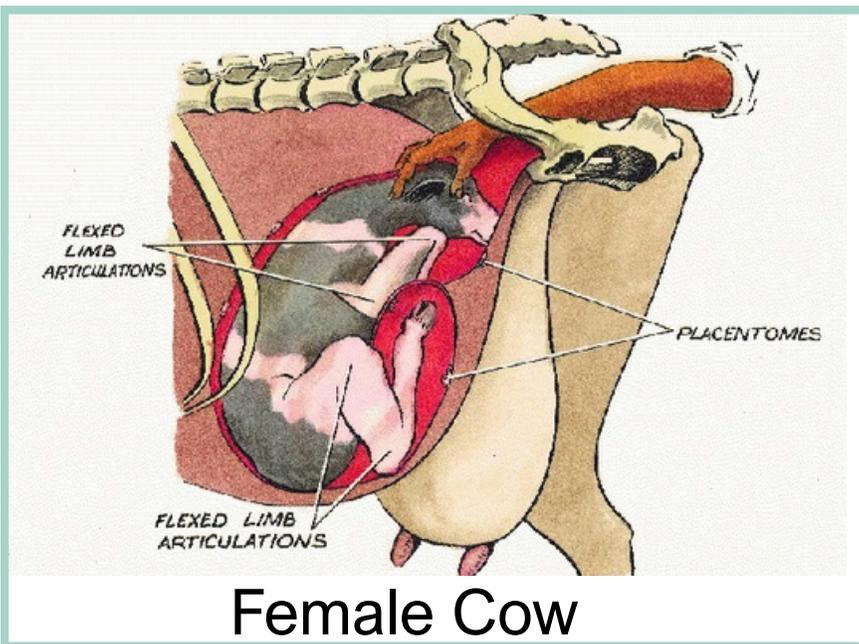

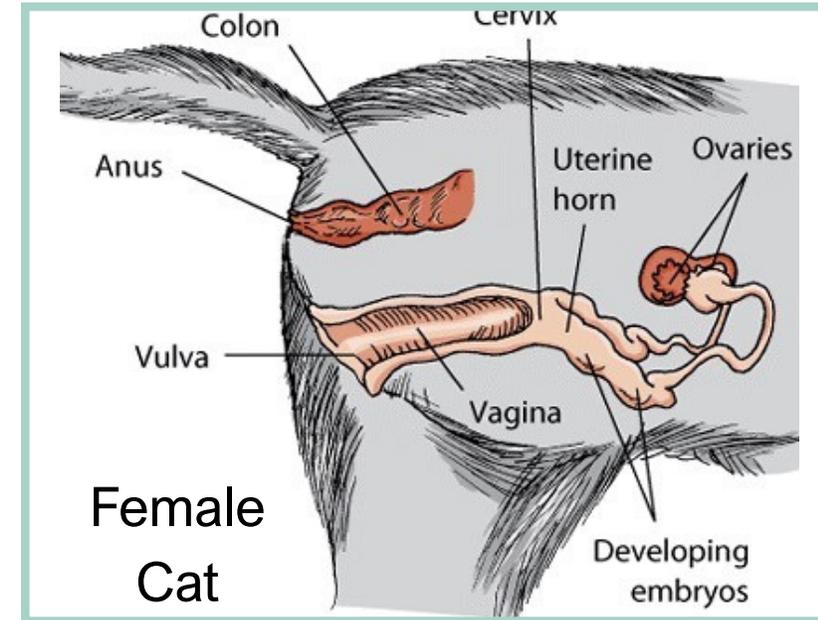

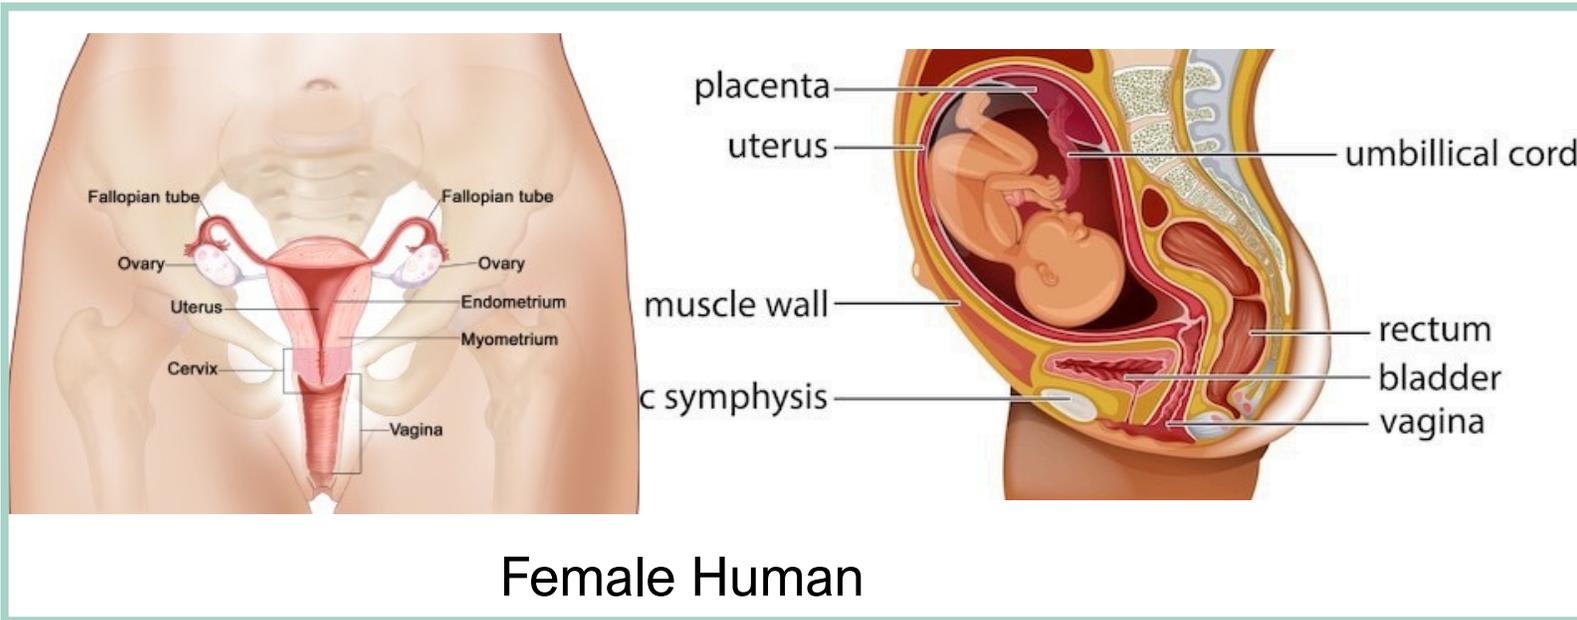

Male Cow

Male Human

Male Cat

Reproductive organs – female

- All mammals give birth to live young-not eggs!

Breastfeeding

- All mammals can breastfeed their babies - they give them milk from their bodies
